Other Skills: Debugging, Technical Writing, Content Writing, Research, Problem-Solving

---

WORK EXPERIENCE

AI Content Writer   Feb 2023 - Present
Data Annotation

- Developed diverse prompts across natural language and coding domains to train and evaluate generative AI models
- Created sample code in Python, JavaScript, and HTML to assess AI models' ability to understand, generate, and debug code
- Tested models' performance on coding tasks such as explaining code snippets, identifying errors, and writing functions from descriptions
- Engaged in open-ended conversations and role-play scenarios with AI to evaluate language understanding and generation capabilities
- Curated and provided relevant text data from web pages, documents, and books to train models' reading comprehension and information extraction skills
- Designed test cases to analyze models' robustness in handling ambiguous, incorrect, or unsafe user inputs
- Collaborated with the AI development team to provide detailed feedback and suggestions to refine model architecture, training data, and output quality

Freelance Writer and Editor   Mar 2021 - Present
Self-Employed

- Delivered high-quality content for diverse clients across multiple industries, including BetterHelp, Glassdoor, Glority Software, Growthink, and Microsoft
- Distilled complex topics into clear, compelling content across various formats such as articles, website copy, e-books, business plans, and technical documentation
- Partnered with cross-functional teams to align on project requirements and goals, provide status updates, and incorporate feedback to ensure successful on-time delivery
- Juggled multiple simultaneous projects with ease, consistently meeting deadlines through excellent organization, prioritization, and attention to detail
